Subject:	Optimize access to object properties from fedora by relying on updated profile method in REST API		
Description:	You can now get all of an object's properties by hitting profile on Fedora's REST API. Previously, you had to hit objectXML to get all of them. Update the Fedora::Base.profile method to pull all of the properties Update Fedora::Baseproperties_from_fedora to rely on .properties rather than parsing the full object xml		

History

09/21/2009 06:29 PM - Matt Zumwalt

- Target version changed from 1.0.9 to 1.0.7

09/21/2009 06:33 PM - Matt Zumwalt

- Status changed from New to Closed

Finished the work & committed to bitbucket, but couldn't post the gem from my current wifi network (wonkiness).
